

# Certificate tools

**RA-light** offers self-service issuance of test certificates (end-user and merchant certs). Merchant certs can be activated via **Sky-MAT**.

	prod	preview	pre-prod	prototype <sup>1</sup>	doc
<b>End-user certificates</b>					
Change password (netcentric)	<a href="#">changepass</a>	na	<a href="#">changepass</a>	na	na
Issue end-user test certificates (netcentric, mobile <sup>2</sup> )	na	na	<a href="#">ra-light</a>	<a href="#">ra-light</a>	doc
<b>Merchant certificates</b>					
Issue merchant test certificates	na	na	<a href="#">ra-light</a>	<a href="#">ra-light</a>	doc
Activate merchant cert for use with BankID-server (bid-file)	na <sup>3</sup>	na	<a href="#">sky-mat</a>	<a href="#">sky-mat</a>	doc
Activate merchant cert via PKCS10 for B2B-applications (PKCS7-file)	<a href="#">sky-mat</a>	na	<a href="#">sky-mat</a>	<a href="#">sky-mat</a>	doc

1) Only available from development partners with whitelisted IP-addresses

2) Works only with specific SIM-cards that are registered for user in pre-production

3) The legacy Java-based HAT-tool must be used to activate merchant certs in production for use with BankID-server.
