

# unrollEndUser

URL	https://<xid-useradm-baseurl>/<pid>
Request	DELETE with URL path parameter <code>pid</code> (same as <code>bankid_altsub</code> ) for user in question
Authentication	<a href="#">Access Token</a> as <a href="#">Bearer Token</a> in Authorization Header
Success response	204 No Content
Error response	403 Forbidden if the bearer token is not accepted for any reason 400 Bad Request if <code>pid</code> is not an xID user or if resource access is insufficient (missing scope)
Example	See <a href="#">below</a>

This method unrolls from the xID service any previously enrolled end user identified by `pid`.

**Note:** The end user is not permanently deleted. Data is retained for one month to simplify re-enrolment of the end user in this grace period.

## Example

```
zzz
```
