

# Environments

Environment	Description
<b>PRE-PROD</b>	Semi-stable environment with test data. Used for integration and test of upcoming releases.
<b>PROD<sup>1</sup></b>	Stable environment with production data. This is a full-capacity production environment with dual data centers offering a SLA of 99,7%
<b>CURRENT</b>	<p>Stable environment with test data. Used for integration and test with the latest release. This environment is equal to <b>PROD</b> in features and functions but uses test data from pre-prod and has down-scaled capacity.</p> <p><b>CURRENT</b> is the preferred integration and test-environment for merchant who are not in need of upcoming features.</p>

See [changelog](#) for changes between the release(s).

## 1) Preview features

Some features and functions in **PROD** may have preview status. Preview features are fully-functional and works on production data, but comes with no SLA guarantees. Preview features are ment for early evaluation among designated customers, but are not yet ready for full-scale commercial use.
