

Test cases

- Recommended test case set for Switchover
 - Netcentric usage verification Test scenarios Netcentric certificates
 - Issuing verification
 - Test scenarios Netcentric certificates created before cutover
 - Test scenarios Netcentric certificates created after cutover
 - BankID on mobile certificates
 - Test scenarios BankID on mobile certificates created before Cutover
 - Test scenarios BankID on mobile certificates created after cutover

Recommended test case set for Switchover

Netcentric usage verification

Test scenarios Netcentric certificates

Nr	Testcase	Expected test result
1	Perform an Authentication with the Netcentric BankID which was created before cutover using HA1 (generated code)	Authentication is done with ok result
2	Perform an Authentication with the Netcentric BankID which was created before cutover using HA2 (generated code)	Authentication is done with ok result
3	Perform Sign with the Netcentric BankID which was created before cutover	Signing is done with ok result

BIM internet usage verification

Test scenarios BankID on mobile

Nr	Testcase	Expected test result
1	Perform an Authentication with a BankID on mobile which was created before cutover	Authentication is done with ok result
2	Perform Sign with a BankID on mobile which was created before cutover	Signing is done with ok result
3	Perform a Netcentric authentication with BankID on mobile as OTP	Authentication is done with ok result

BIM extranet usage verification

Test scenarios BankID on mobile certificates (Nettbank)

Nr	Testcase	Expected test result
1	Perform an Authentication with a BankID on mobile which was created before cutover	Authentication is done with ok result
2	Perform Sign with a BankID on mobile which was created before cutover	Signing is done with ok result
3	Perform a Netcentric authentication with BankID on mobile as OTP	Authentication is done with ok result

Issuing verification

Test scenarios Netcentric certificates created before cutover

Nr	Testcase	Expected test result
1	Perform a Suspend on Netcentric BankID which was created before cutover	Verify that the BankID is suspended in RA
2	Perform an Revoke on Netcentric BankID which was created before cutover	Verify that the BankID is revoked in RA
3	Perform a Renew on Netcentric BankID which was created before cutover.	Verify that the BankID is renewed in RA

4	Perform an Authentication with the Netcentric BankID which was Renewed above	Authentication is done with ok result
5	Perform a Sign with the Netcentric BankID which was Renewed above	Signing is done with ok result
6	Perform an Reissue (order new password) on Netcentric BankID which was created before cutover	Verify that renewal of certificate is ok
7	Perform an Authentication on Netcentric BankID which was Reissued above	Authentication is done with ok result
8	Perform a Sign with Netcentric BankID which was Reissued above	Signing is done with ok result
9	Perform a Reinstate on a certificate which was Suspended before cutover	Certificate was successfully Reinstated and is in Activated status
10	Perform an Authentication on Netcentric BankID which was Reinstated above	Authentication is done with ok result

Test scenarios Netcentric certificates created after cutover

Nr	Testcase	Expected test result
1	Perform an Authentication with the Netcentric BankID which was created after cutover	Authentication is done with ok result
2	Perform Sign with the Netcentric BankID which was created after cutover	Signing is done with ok result
3	Perform a Suspend on Netcentric BankID which was created after cutover	Verify that the BankID is suspended in RA
4	Perform a Reinstate on Netcentric BankID which was created after cutover	Verify that the BankID is activated and auth/sign is OK
5	Perform an Authentication with Netcentric BankID which was Reinstated above	Authentication is done with ok result
6	Perform an Revoke on Netcentric BankID which was created after cutover	Verify that the BankID is revoked in RA
7	Perform a Renew on Netcentric BankID which was created after cutover	Verify that the BankID is renewed in RA
8	Perform an Authentication with Netcentric BankID which was Renewed above	Authentication is done with ok result
9	Perform a Sign with Netcentric BankID which was Renewed above	Signing is done with ok result
10	Perform Reissue (order new password) on Netcentric BankID which was created after cutover	Verify that the BankID is renewed in RA
11	Perform an Authentication with Netcentric BankID which was Reissued above	Authentication is done with ok result
12	Perform a Sign with Netcentric BankID which was Reissued above	Signing is done with ok result

BankID on mobile certificates

Test scenarios BankID on mobile certificates created before Cutover

 When BankID on mobile is renewed, generation of new certificates will be done immediately (requires some process time)

Nr	Testcase	Expected test result
1	Perform an Suspend on a BankID on mobile which was created before cutover	Verify that the BankID is suspended in RA
2	Perform an Revoke on a BankID on mobile which was created before cutover	Verify that the BankID is revoked in RA
3	Perform a Renew on a BankID on mobile which was created before cutover	Verify that the BankID is renewed in RA
4	Perform an Authentication with the BankID on mobile which was Renewed above	Authentication is done with ok result
5	Perform a Reinstate on a certificate which was Suspended before cutover	Certificate was successfully Reinstated and is in Activated status
6	Perform an Authentication with the BankID on mobile which was Reinstated above	Authentication is done with ok result

Test scenarios BankID on mobile certificates created after cutover

 When BankID on mobile is renewed, generation of new certificates will be done immediately (requires some process time)

Nr	Testcase	Expected test result
1	Perform an Authentication with a BankID on mobile which was created after cutover	Authentication is done with ok result
2	Perform Sign with a BankID on mobile which was created after cutover	Signing is done with ok result
3	Perform an Suspend on a BankID on mobile which was created after cutover	Verify that the BankID is suspended in RA
4	Perform a Reinstate on a BankID on mobile which was created after cutover	Verify that the BankID is activated and auth/sign is OK
5	Perform an Authentication with the BankID on mobile which was Reinstated above	Authentication is done with ok result
6	Perform an Revoke on a BankID on mobile which was created after cutover	Verify that the BankID is revoked in RA
7	Perform a Renew on a BankID on mobile which was created after cutover.	Verify that the BankID is renewed in RA
8	Perform an Authentication with the BankID on mobile which was Renewed above	Authentication is done with ok result
