Certificate tools

RA-light offers self-service issuance of test certificates (end-user and merchant certs). Merchant certs can be activated via **Sky-MAT**.

	prod	preview	pre-prod
End-user certificates			
Change password (netcentric)	changepass	na	changepass
Issue end-user test certificates (netcentric, mobile[1])	na	na	ra-light
Merchant certificates			
Issue merchant test certificates	na	na	ra-light
Activate merchant cert for use with BankID-server (bid-file)	na[2]	na	sky-mat
Activate merchant cert via PKCS10 for B2B-applications (PKCS7-file)	sky-mat	na	sky-mat

1) Works only with specific SIM-cards that are registered for user in pre-production
2) The legacy Java-based HAT-tool must be used to activate merchant certs in production for use with BankID-server.
